

- -40 to +65°C Operation
- Connects up to 3 Model 2010 Accelerometers to a Model 3320 **G-LOGGER™**
- Switchcraft "Weathertight" EN3 locking bayonet style connectors for Model 2010 accelerometer ends
- D-Subminiature style connector for Model 3320 **G-LOGGER™** end

### **DESCRIPTION**

The model 3901 Cable Adapter is used to connect up to three model 2010 Single Axis Digital Accelerometer Modules (priced separately) to a model 3320 **G-LOGGER™** (priced separately). The connection length between the 3901's D-Subminiature connector and the model 3320 may be extended an additional 10 feet via the D-subminiature 9-pin flat extension cable (included with the model 3320). Please note that the temperature limits for this cable adapter are -40 to +65°C which is greater than the thermal limits of the model 3320 but less than the thermal limits for the model 2010 accelerometer.
